Tenants... are you insured?

All too often we hear terrible stories about renters devastated by accidents. But did you know that the average insurance premium for tenants is as little as \$200/year? Learn the rule of thumb for determining how much coverage you need. [Read more](#)

Have you heard of the match trick?

To quickly check if your tire treads measure up to Ministère des Transports' minimum allowed depth of 4.8 mm, insert the sulphured end of a match into a groove. If the sulphured end is completely hidden, you're ready to roll.

Get more traction in snow

Contrary to what most people think when it comes to driving on snowy roads, narrow tires have better traction than wide tires, which tend to float over snow.

[Read more](#)

Don't forget that starting this year, the law requires you to equip your vehicle with winter tires between December 15 and March 15.

Winter Words to the Wise

Already familiar with the same old advice for safe and environmentally friendly winter driving? We've put together some terrific tricks and little-known pointers to help you on your way.
